

URINARY HYDROXYPROLINE: URINE COLLECTION INSTRUCTIONS

COLLECTION CONTAINER:

24-hour urine container with added HCl Available at:

Casatenovo Presidio: Collection Center (Floor 0) from 08:00 to 09:30 or at the Analysis Laboratory Secretariat (Floor 1) from 08:00 to 15:30

COLLECTION METHOD:

Discard the first urine of the morning. Then start collecting all urine produced in the following 24 hours, including the first urine produced the following morning. During collection, keep the container in a cool, dry place. It is recommended to carefully close the container to prevent urine from leaking out during transport.

RECOMMENDATIONS:

It is necessary to abstain from consuming meat and derivatives in the 2 days before the start of the harvest and during the entire harvest itself.

Delivery times: Collection room, Ground Floor Mon.-Fri. 08:00-09:30
